DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/306634, filed on May 7, 1999.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Mirtain (4,034,791).

See the embodiment of Figure 4: radial carcass of known construction (col. 1 lines 14-17: rubberized cord ply toroidally extending between a pair of bead cores), steel cord cross plies 10 and 11, nonmetallic cord flaps 12 and 13 have portions 12a, 13a extending the maximum-width steel cord ply 10 (same direction) and portions 12b, 13b extending the narrow-width steel cord ply 11 (opposite direction to maximum-width belt layer), steel cord angle 18 degrees and nonmetallic cord angle 12 degrees (col. 3 lines 53-63).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mirtain (4,034,791).

Art Unit 1733

See paragraph 3 above: it would have been obvious to one of ordinary skill in the art to provide such conventional carcass construction in the radial tire above.
